PYRO
CRAFTERS
by aney

Hi, I'm Aney Carver.

PYROGRAPHY ARTIST,
INFLUENCER, PUBLISHED
AUTHOR, CREATIVITY
EXPLORER, AND
ENTREPRENEUR.

When I'm not in my shop.

I'm a hanging with my family type of person, playing video games, and I sing show tunes to get motivated. I also love yard sailing, flea market hunting, bringing our 100 year old house back to life. Nice to meet you!

Now, I'm usually very modest, **but**

I can burn, paint, design, photograph, you name it! From heavy textured burns to nature tiles, I can do it all.

Oh, and I have two published how-to wood burn books.

My First Book!

I love teaching people to wood burn through my social videos, but being able to become an author was another level. I'm so honored to pass on what I've learned.

"I'm really happy with this book. There's lots of great information, projects, and templates. I love that there is information on the types of wood and how to preserve your work, other books I've seen don't have this. I highly recommend this to anyone who interested in starting some wood burning projects." -June78

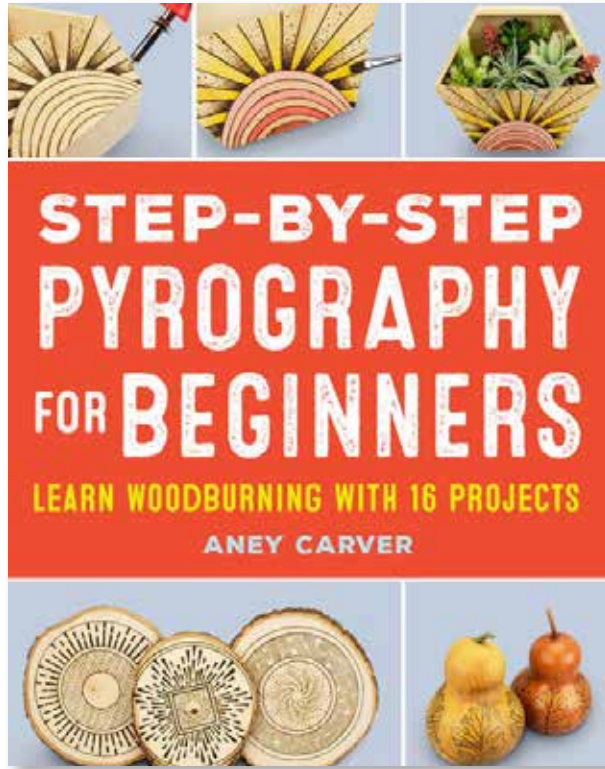

"Drawing with Fire shows you just how versatile, relaxing and useful wood burning can be, and gives you the information you need to dive right in!"

-Rachel Strauss, of @woodburncorner,
author of The Wood Burn Book

“Aney Carver is such an engaging instructor in live classes, engaging informative in her YouTube videos and her book is the same. Simple instructions - clear without fuss - lovely patterns and very doable projects. I like the fact that the projects are useful, doable and something I’d want in my house.

” -Zona

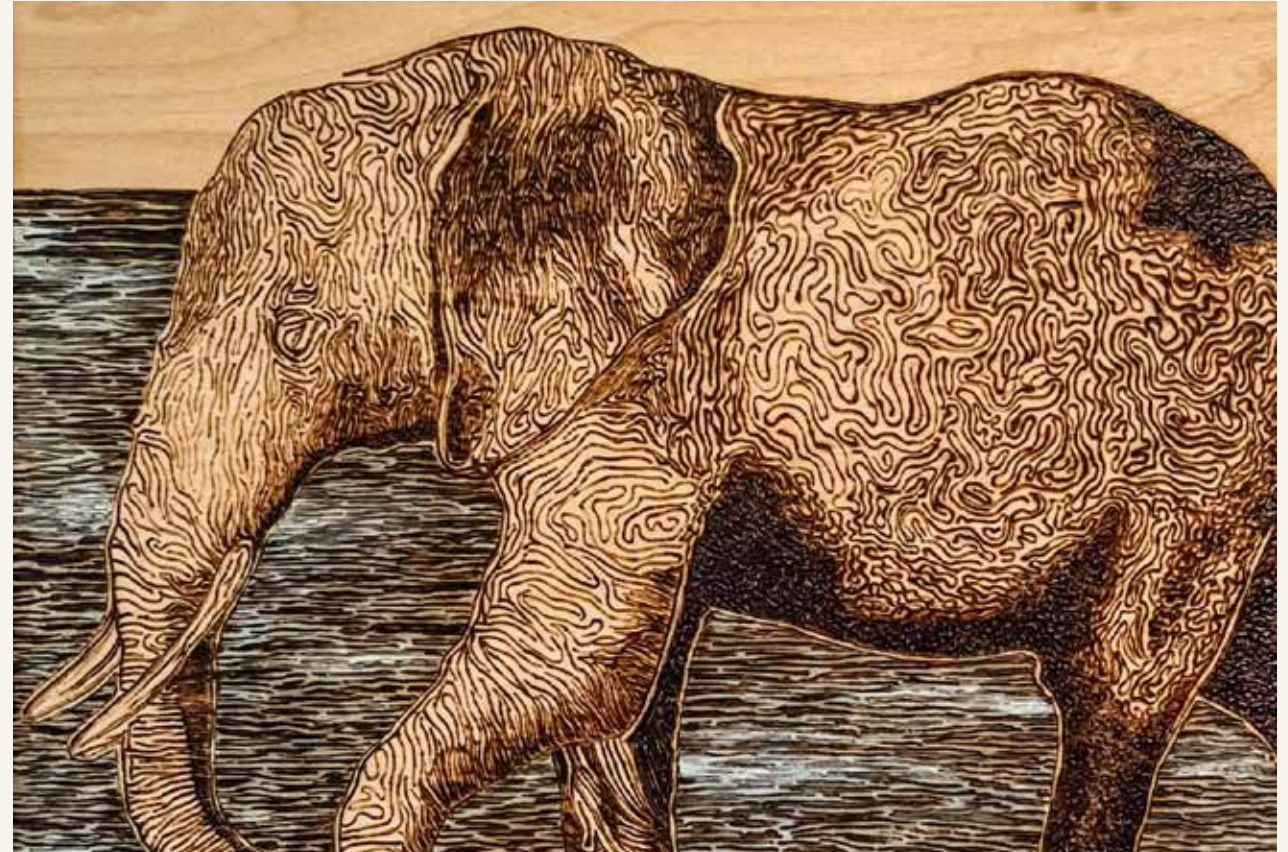

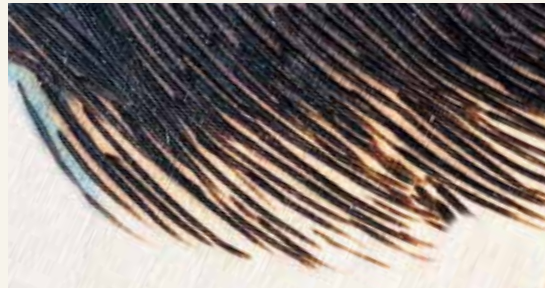

“Aney’s latest pyrography book demonstrates her vibrant and creative slant on the craft. Featuring a helpful selection of advice and instructions alongside a range of projects to suit all abilities, this book will be a useful point of reference to both new starters and those looking for fresh inspiration.”

—Simon Easton, Wood Tattoos

My Second Book!

What?! I got the chance to write another book! I was able to dive into the how-to process for this book and provide so many details about what makes wood burning great.
